Put an animated slide show together that lets your friends and family see your latest slides in high-quality, full-color video. ProShow Gold lets you share your creations with everyone. Upload them to YouTube, Vimeo, Dailymotion, MetaCafe, AOL, and Facebook. Makes your video presentation complete. With ProShow Gold, you can create professional slide shows that include not only your slides, but also video or audio for your slides, graphs, icons, transitions, slide effects, and more. ProShow Gold lets you add several new video effects for your video presentations. Video options: video from the internet video from a DVD or video CD Your choice of video output or output format, such as MP4 or DV Animated transition effects Transitions from slide to slide Image-to-video transition effects Slide-to-video transition effects Line, zoom, fade, wipe, and other effects Slide-to-playback transition effects Image, text, and animation effects Standard and multiple video tracks Text and voice overlays Font options for text Picture-in-picture (with Windows Media Center) Video from video file, JPEG, GIF, PNG, BMP, or TIFF Video from file Video from tape Video from DVD Video from CD HD video from DVD Record video on a compatible webcam Record video from a video camera Add voice-over narration ProShow Gold's default video output is "Video for Windows Media Center", which is a full-screen video that can be played in Windows Media Center. But you can record full-screen or windowed video in any resolution and format. You can also record DV video, DVD video, and any audio in a format that your camcorder can record. Multiple video output options lets you record the same video in multiple output formats. You can use video output options for DVD or video CD-ROMs. You can also output the same video to a video file, an online video site, or a DVD.]. The speed-up of the iteration process in the GONM is increased by the parallelisation of the calculation of the voxel weights. Since only the label field of the input-output pairs has to be exchanged between the threads, there is no need to synchronise the 82157476af
